California Agri Diagnostics Report

Report: 04-15-25

Disc Diffusion Assay showing visual test results of *Fusarium oxysporum* fungal species treated with RETAIN Garden Tool Treatment and with 10% bleach.

Left to Right – RETAIN, 10% bleach and control

No growth of *Fusarium* sp. observed in RETAIN and 10% bleach.

Disclaimer: The results given are representative of the samples submitted for analysis. The laboratory results are based on the condition of the samples received at the time of testing. Depending on the type of diagnosis, confirmatory testing may be required. All the other factors contributing to the accuracy of diagnosis are controlled within the scope of CALIFORNIA AGRI DIAGNOSTICS LLC laboratory program.
